Custom Printed Table Tents

In Europe a number of food outlets are printing QR Codes linking customers directly to the a la carte or takeaway menus. The QR Codes appear at the takeaway counter or are placed on tables for customers who are seated to replace physical menus.

Another alternative is printing the QR Codes and info onto adhesive notes and sticking them to the table surface. Venues use adhesive notes so they don't blow away when doors are opened. Similar to this option, low tack self adhesive vinyl or cling stickers can be used in lieu of a paper note. The synthetic material allows the sticker to be wiped clean.

Distancing Table Mats

Restaurants and cafes have been opening to a reduced number of patrons in order to adhere to guidelines on social distancing.

Our Table Mats are a perfect way to alert the customers whether or not tables are available. These mats can be produced out of synthetic materials which make them waterproof and allow the restaurant staff to wipe them down after each sitting. Instead of just being a placeholder that is removed from the table once occupied, the mats can also be produced with a laminated surface which converts the product into a practical placemat.

Instruction Posters / Wall Graphics

The perfect way to inform everyone about the guidelines on social distancing.

Many establishments have been using adhoc signage to convey information about distancing inside their premises as many thought this was going to be a short-lived temporary scenario. Now that it looks like we are in for the long haul, good quality and more permanent signage is a better option.

A couple of these options are paper posters, synthetic posters and permanent or removable self adhesive wall graphics. These can be printed in A3, A2 & A1 sizes depending on the area of application.

Custom Printed Face Shields

In the current environment face shields are becoming more popular largely due to the fact they stop the user from touching their nose, eyes and mouth.

Our innovative design can be worn two ways: The shield can be attached directly to reading glasses, sun glasses or safety glasses and held in position with two washable custom printed silicone patches. Alternatively the shield can be fitted to the custom printed head band.

The visor is made from crystal clear 350um APET. The custom printed head band is 260gsm artboard lined with soft PVC for comfort.

Button Barrier Notes Dispenser

Do you find that you are pushing buttons - lifts, loos, eftpos, ATMs or looking for a quick way to open a door without touching the buttons/handle?

The innovative solution is 200 sheets of 70x70mm paper in a dispenser box with a bin that can be mounted to walls, doors and lift panels. When required grab a sheet of paper and place it over the button to be pressed, or wrap it around your finger and then press the button. The used sheet of paper can then be disposed of in the bin provided.

The dispenser box and bin has a silicone patch on the back side with a protective covering. Once the covering is removed the box can be mounted to any smooth surface then easily removed when empty without leaving residue.

The paper sheets are unprinted but the dispenser box can be custom printed with your artwork.

Trolley Barrier Notes

Unprotected contact on common surfaces can allow communal spread of germs and viruses.

A clever solution is clean removable self adhesive paper (sticky notes) that can be used as a short term barrier on the handles of trolleys and baskets.

Staff could distribute the sheets, or alternatively pads with a number of sheets could be made available to customers so they can use the sheets in store and keep the remainder of the pad for the next shop.

The 10 leaf pad is 300 x 140mm with a perforation so the covering sheets can be applied as one handle 300 wide x 140mm deep or torn on the perforation to make two handles 150 wide x 140mm deep.

Social Distance Grip Grafix

Help keep people safe by reminding them about social distancing. Whether it's a large reminder at the entrance or smaller reminders throughout the store Grip Grafix are an easy solution.

Grip Grafix are a revolutionary new non-slip floor decal suitable for many floor / wall surfaces indoors & outdoors including carpet. (Not suitable for ultra smooth surfaces such as polished floor boards, polished stone, gloss tiles etc) Ideal for exhibition and retail.

Expected Life:
Indoor Floor (Low Traffic - 6 months/High Traffic - 3 months)
Outdoor Floor (Low Traffic - 4 months/High Traffic - 1 month)
