3D CRYSTAL
## 2023 CATALOGUE

Customised 3-Dimensional designs laser-engraved inside beautiful crystal awards, gifts and trophies

3D CRYSTAL

Our 3D Crystal collection features the finest crystal awards and trophies, perfect for internal engraving. Customised 3D designs, logos and images are reproduced inside pristine optical crystal one point at a time using state-of-the-art laser technology. With design options only limited by your imagination, these unique awards have incredible "Wow" factor and are guaranteed to demand attention.
Introduction to Internal Engraving

"An internally engraved award is the only solution that allows a full 3D design to be viewed from all angles within an award."

Our premium method of decoration - Unlike traditional decoration methods that leave a mark on the surface, we use state-of-the-art laser technology to engrave internally within our optical crystal awards, leaving the surface untouched. Every 3D design is made up of many thousands of tiny lasered-etched points within the crystal.

The ultimate engraving solution - Create prestigious presentation pieces; your logos and 3D designs appear to float inside the award.

Precise detail - Internal laser engraving provides the highest resolution and clarity for photo engraving.

The "Wow" factor - Take your awards to the next level and leave the recipient in awe. When you want your award to stand out from the rest and show your ultimate appreciation, talk to us about incorporating internal laser engraving into your next award.

Logos & Text	3D Models	3D Portraits

Other Decoration Options

- Advanced Colour Print is an unique method of adhering full colour images onto the surface of optical crystal & acrylic awards and trophies. Cover the complete surface of the crystal, or merely add a colour logo or image to a particular area. Choose from a translucent image, or by adding a white backing the colour image becomes opaque.

- Deep Surface Etching is created when the crystal is blasted with a highly pressurised stream of fine sand. Logos and text are commonly carved into the surface of the crystal. The result has a similar appearance to internal engraving and is the preferred option in certain situations.

BOX18 - 180x160x60mm
